CONCEPT NOTE

1. Background

Africa has set its agrifood systems agenda for the next decade; the challenge now is delivering on it. The Kampala CAADP Declaration on Building Resilient and Sustainable Agrifood Systems in Africa, adopted by African Union Heads of State and Government in January 2025, guides the Comprehensive Africa Agriculture Development Programme (CAADP) from 2026 to 2035. It identifies strengthening Agrifood systems governance as one of six central commitments for transforming Africa's Agrifood sector and outlines out what this requires: evidence-based decisions and mutual accountability; coherent policies and coordinated institutions at national, regional, and continental levels; plans and budgets aligned with CAADP objectives; and inclusive participation and oversight.

Operationalizing the Kampala CAADP Declaration requires more than political commitment. It also requires practical evidence on how governance systems are designed, financed, implemented, monitored, and adapted across different African contexts, and with the first phase of implementation underway, that evidence is needed now.

The Regional Strategic Analysis and Knowledge Support System (ReSAKSS) provides evidence to support policy planning and implementation for Africa's agrifood systems, a role it has fulfilled since 2006. As a leading platform for monitoring CAADP implementation, ReSAKSS tracks progress against key CAADP indicators to support benchmarking, review, and mutual learning. It disseminates this evidence through an interactive website and its flagship Annual Trends and Outlook Report (ATOR), published since 2008.

The 18th edition of the ATOR, ***"The Role of Governance in Advancing Africa's Agrifood Systems Transformation,"*** examines governance concepts, institutional arrangements, policy instruments, thematic governance systems, and country experiences that can inform implementation of the Kampala CAADP agenda.

The ReSAKSS Annual Conference serves as the official platform for presenting and discussing ATOR findings and recommendations with policymakers and other stakeholders. The 2026 conference, convened by AKADEMIYA2063 in partnership with the African Union Commission's Department of Agriculture, Rural Development, Blue Economy, and Sustainable Environment (AUC-DARBE), will provide an opportunity to explore the 2026 ATOR's findings and translate its recommendations into concrete actions to advance implementation at national, regional, and continental levels.

2. Conference Goals and Objectives

The 2026 ReSAKSS Conference will convene agrifood systems stakeholders to examine and apply evidence from the 2026 ATOR to strengthen governance for Africa's agrifood systems transformation.

The conference will seek to:

- Share the findings of the 2026 ATOR and examine the conceptual and practical links between governance and agrifood systems transformation.
- Discuss different governance models and institutional arrangements that support inclusive, resilient, and sustainable agrifood systems, drawing on evidence and best practices from African countries and beyond.
- Strengthen dialogue and coordination among continental, regional, national, and non-state actors around Kampala CAADP implementation.
- Assess the status of CAADP implementation and progress toward achieving key goals and targets.

3. Who Should Attend

The conference will bring together stakeholders from across the agrifood systems governance landscape, including:

- **Continental and regional institutions:** The African Union Commission (AUC), African Union Development Agency – New Partnership for Africa's Development (AUDA-NEPAD), and Regional Economic Communities (RECs).
- **National government and policy institutions:** Ministries responsible for agriculture, trade, finance, environment, and planning; parliamentary committees; and joint sector review platforms.
- **Research and knowledge institutions:** Research institutions, think tanks, and universities.
- **Development and financing partners:** Development partners, international organizations, and financing institutions.
- **Private sector and non-state actors:** Private sector representatives, farmer and producer organizations, and civil society organizations, including women's and youth organizations.

4. Key Discussion Areas

The conference discussions will be organized around the three substantive sections of the 2026 ATOR, followed by a review of progress on CAADP implementation.

4.1 Theories, concepts, and instruments of agrifood governance

The first part examines the foundations of agrifood governance and the institutional and policy instruments needed to support transformation: why governance matters, how to analyze the actors, institutions, incentives, and power relations involved, and how state-led, market-based, hybrid, multi-stakeholder, and decentralized models compare across the local, regional, and international levels.

4.2 Thematic governance systems

The second part examines how governance operates across specific areas of the agrifood system: food security, nutrition, and food sovereignty; climate, environment, and natural resources; land governance and tenure; technology, digitalization, and data; trade, value chains, and competitiveness; and gender equality, youth participation, and social inclusion.

4.3 Country and subnational case studies

The third part presents selected country- or subnational-level experiences that demonstrate effective governance practices, outlining the challenge addressed, the institutional and policy response, how it was financed and implemented, the results and lessons learned, and the conditions for replication or scale-up.

4.4 Tracking CAADP implementation

The final part reviews trends in key CAADP indicators and progress in implementing the Kampala CAADP Declaration, including national and regional accountability systems, data availability and quality, the role of joint sector reviews, and priorities for strengthening monitoring and reporting.

5. Structure of the Conference Program

The three-day virtual event is designed to foster policy dialogue. Day 1 sets the stage with framing remarks, an overview of the 2026 ATOR, a high-level panel on why governance matters, and a first roundtable on the report's conceptual foundations. Day 2 focuses on the governance of natural resources, markets, and innovation. Day 3 shifts from evidence to action, covering country experiences and CAADP implementation, followed by a high-level closing panel.

6. Expected Outcomes

The conference will formally launch the 2026 ATOR. Key findings and recommendations, along with policy messages, will be presented based on the findings of the ATOR chapters.

Beyond the event itself, it is expected to strengthen the uptake of evidence, including ReSAKSS knowledge products, in policy and investment decisions and in CAADP monitoring and mutual accountability; improve the alignment of national and regional plans with the Kampala CAADP Declaration; deepen collaboration among policymakers, researchers, private-sector actors, and non-state stakeholders; and identify inclusive, accountable governance practices from across Africa that can be scaled.
